

# easygreen® | EASY 800

## KNOW MORE ABOUT YOUR NEXT SHOT

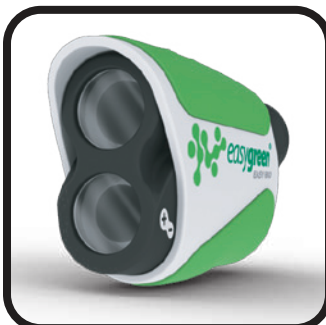

The Easygreen EASY 800™ is a Quality Golf Laser Rangefinder designed to give you the most accurate information possible about your next golf shot. Our patented Plus Minus™ system allows you to read every shot like a pro. It is possible to not only measure distances to objects, but also to measure the relative distances between objects, points or hazards on the hole.

We designed the EASY 800 to be durable with a fully weatherproof housing and comfortable ergonomic silicone grip. Inside we used the best electronics and fully coated lenses available to ensure quick and accurate readings on every shot. At Easygreen we are Golfers, Designers and Engineers.

Easygreen - " Making Golf Easy. "

### SPECIFICATIONS

RANGE: 5 - 800 M  
ACCURACY +/- 1M  
6X OBJECTIVE LENS  
UNITS: M or YARDS  
LENSES: FULLY MULTI COATED LENSES  
BATTERY: LITHIUM CR2  
3000 - 5000 USES PER WEATHERPROOF  
MODES: PLUS MINUS, RAIN, FOG, and LONG.  
WARRANTY: 2 YEAR

High quality Fully Multi Coated Lenses in weatherproof sealed housing.

**EYEPIECE**  
Adjustable focus and soft natural rubber eyepiece.

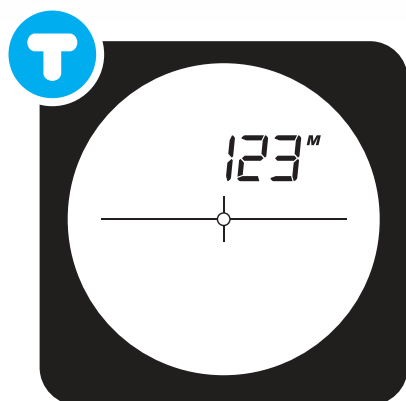

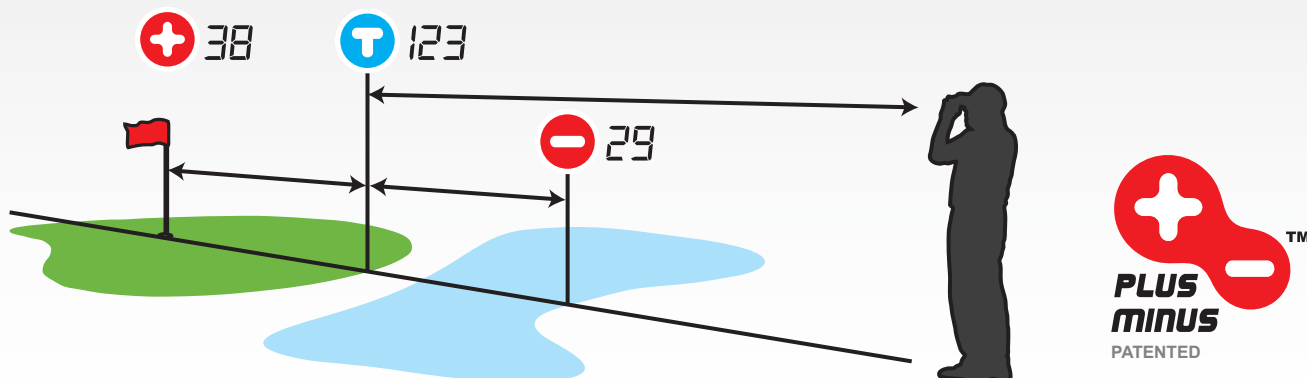

**BATTERY**  
Waterproof sealed CR2 lithium battery housing.

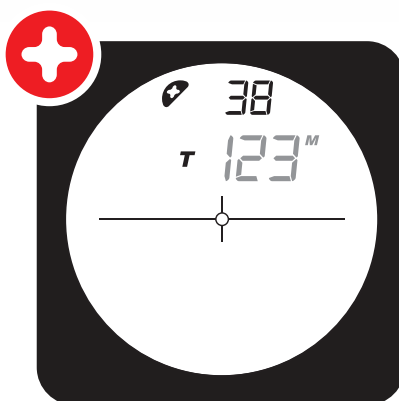

**BODY DESIGN**  
Ergonomic all Silicone grip.

# PLUS MINUS™ SYSTEM

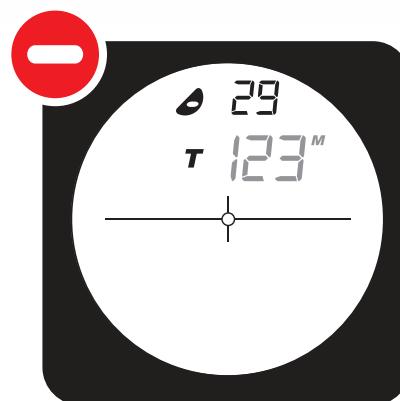

Unique to the Easygreen EASY 800 is our patented PLUS MINUS™ measurement system which allows a golfer to have much more information and a better understanding of their next golf shot. Guessing distance is very inaccurate. Guessing two distances is even more so. So why base your club selection on so many guesses. The Easygreen PLUS MINUS System simply and quickly gives you more information about your next shot.

*For Example a MAIN TARGET distance can be measured to the front of the green and the EASY 800 operates like a standard Laser Rangefinder.*

*Then, using the Plus Minus Button, the actual distance from the front of the green to the FLAG can be measured. This shows the golfer the exact landing area on the green to help with proper club selection.*

*The player can further measure the length of a HAZARD in front of the green by pressing the Plus Minus button again on a new Plus Minus Target, helping the player with club selection to clear hazards such as sand or water hazards on approach shots.*
